

Rishabh Sharma

Full-Stack Software Engineer · Backend-Heavy · MERN Stack

rixhabh01@gmail.com · +91-9084221949 · [linkedin.com/in/rishabhsharmaai](https://www.linkedin.com/in/rishabhsharmaai) · github.com/rishabhsharmaai

PROFESSIONAL SUMMARY

Full-Stack Software Engineer (~2 years) specialising in backend architecture and admin panel development for production client applications. Sole backend engineer on 5+ completed projects, currently managing 4 simultaneous live products — independently building REST APIs, real-time systems, RBAC, payment integrations, and cloud infrastructure on the MERN stack. Experienced with Stripe, Razorpay, PayPal, eWay, AWS (S3, SNS, Lambda), Redis, BullMQ, Firebase, and Google Maps APIs. Actively exploring AI/ML — built an agricultural AI agent using RAG and vector embeddings. Seeking high-growth product or startup environments with strong engineering culture.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Java, Python
Frontend	React.js, HTML5, CSS3, Bootstrap, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, JWT Auth, Role-Based Access Control (RBAC)
Database	MongoDB, Mongoose, Redis
Queue/Jobs	BullMQ (background jobs, email/SMS queuing, scheduled tasks)
Cloud	AWS S3, AWS SNS, AWS Lambda, Firebase (Realtime DB, Auth, FCM)
Payments	Stripe, Razorpay, PayPal, eWay
Integrations	Google Maps API, Nodemailer, SMS Gateway, ERP API Integration
AI / ML	Generative AI, Prompt Engineering, RAG, Vector Embeddings, LangChain, AI Agents
Methods	Agile, Scrum, REST API Design, Performance Optimisation, Code Review

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Backend Lead) — Aayan Infotech, Lucknow

Dec 2024 – Present

- Sole backend engineer across 5+ completed client projects and 4 simultaneous live productions — independently designing, building, and deploying all server-side systems.
- Architected scalable REST APIs across marketplace, e-commerce, mentorship, and location-based service platforms using Node.js, Express.js, and MongoDB.
- Built RBAC systems supporting 3–5 user roles with JWT-secured routes; integrated Stripe, Razorpay, PayPal, and eWay for subscriptions and one-time payments.
- Implemented real-time chat and notifications via Firebase; background job processing via BullMQ and Redis for email/SMS queues and scheduled tasks.
- Integrated AWS S3, SNS, Lambda, Google Maps API, Nodemailer, and SMS gateways across projects; collaborated in Agile/Scrum team managing multiple concurrent deadlines.

Full-Stack Developer Trainee — Kmitr (Remote)

Jun 2024 – Nov 2024

- Built responsive React.js frontends and developed JWT-authenticated REST APIs with role-based access control in a remote Agile team.
- Implemented structured API integration patterns that significantly reduced client-side errors through consistent error handling.

KEY PROJECTS

Subscription-Based Service Marketplace (Urban Company-Style Platform)

[Node.js](#) · [Express.js](#) · [MongoDB](#) · [Firebase](#) · [Stripe](#) · [AWS S3/SNS/Lambda](#) · [BullMQ](#) · [Redis](#)

- Built two full platform versions solo — English and fully bilingual Arabic-English — with all notifications, emails, chat, and data dynamically served in the user's preferred language.
- Engineered location-based job matching with distance-aware listings across Pay-Per-Lead, Monthly, and Annual subscription tiers.
- Built real-time chat (Firebase), AWS Lambda-powered chat translation, mass email/push notification system (BullMQ + Redis + AWS SNS), and Stripe subscription billing with webhook lifecycle management.
- Developed a comprehensive admin panel for users, providers, subscriptions, job listings, and platform analytics.

Mentorship & Rehabilitation Management System

[Node.js](#) · [Express.js](#) · [MongoDB](#) · [Firebase](#) · [JWT](#) · [Google Maps API](#)

- Built entire backend and admin panel solo — 4-tier role hierarchy (Mentor, Instructor, User, Student/Prisoner) with scoped permissions and JWT-secured routes.
- Developed location-based session management, attendance tracking, content access (notes, questionnaires), journals with configurable visibility, and a certification/milestone engine.
- Enabled mentor monitoring of instructor performance and user progress via a real-time admin dashboard.

Multi-Branch Food E-Commerce Platform (Italian Restaurant Chain)

[Node.js](#) · [Express.js](#) · [MongoDB](#) · [React.js](#) · [Redis](#) · [BullMQ](#) · [Razorpay](#) · [Google Maps API](#) · [SMS & Email](#)

- Sole backend and admin panel engineer for a multi-branch delivery platform managing 6,000+ SKUs — with ERP sync, location-based branch routing, and inter-city courier capability.
- Built slot-based delivery engine (Standard, Slot-Based, Pre-Midnight) with dynamic pricing; automated courier and delivery agent assignment with a dedicated agent app backend.
- Implemented Redis caching for fast availability checks across 6,000+ SKUs; built granular role-based admin panel (Company Staff, Store Admin, Store Staff, Panel Owner) with chat support, SMS, and email.

Agricultural AI Agent (Personal Project)

[Python](#) · [LangChain](#) · [RAG](#) · [Vector Embeddings](#) · [Generative AI](#)

- Built an experimental AI agent for agricultural advisory using RAG pipelines and vector embeddings to answer domain-specific farming queries; explored LangChain and prompt engineering.

EDUCATION & CERTIFICATIONS

B.Tech — Computer Science & Engineering

GLA University, Mathura · 2024 · CGPA: 7.5/10

Full-Stack Web Development

Udemy Certification

Data Structures & Algorithms

Coursera Certification
